Surface Transportation Board

To those evaluating the Central Utah Rail Project,

My wife and I have been residents here in Sevier County since 1989 and enjoy it very much. The community has been a positive environment in which to raise our children.

The rail line that used to exist in this area was discontinued shortly before we moved here. Through the years we have marked an increase of the coal truck traffic going north out of the Sevier Valley. Indeed with family along the Wasatch Front, we travel amongst this truck traffic frequently.

We were excited to hear of the proposal to bring back a rail line to assist in the more efficient transportation of this coal, and the other potential windfalls that would be possible with the railroad line. Please consider us as two votes in favor of proceeding with this plan, we support the capabilities and positive affects of the project.

Thanks for your time,

Brent Lambson
Richfield, Utah
